GRADUATE PROFILE & PROJECT CV 10

Riya Desai

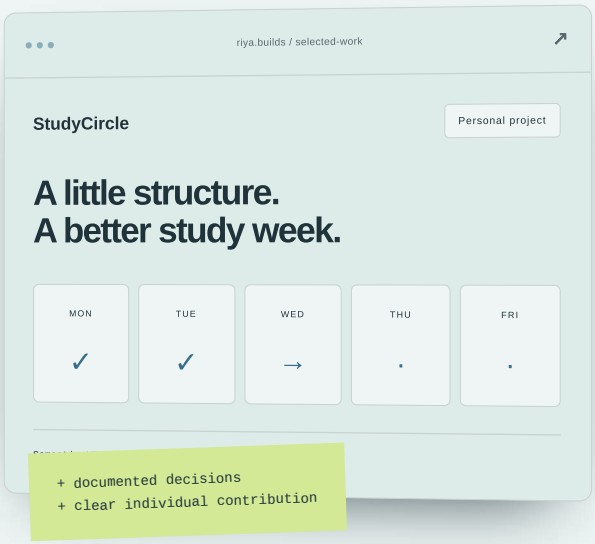

Computer Science Graduate · Frontend Developer

ILLUSTRATIVE PHOTO

New to the industry. Not new to doing the work.

A frontend-focused graduate who enjoys turning real user tasks into accessible web experiences. My portfolio shows the decisions, experiments and small details behind the final screens.

02	04	01
FEATURED PROJECTS	CORE FRONTEND FOUNDATIONS	CLEAR ROLE TARGET

THE PROFILE IN CONTEXT

I am looking for an early-career role where I can contribute, ask good questions and learn through feedback. My sample projects combine HTML, CSS, JavaScript and React with an interest in accessibility and clear information design. I document what I built independently, what came from learning material and what I would improve next. The goal is honest evidence of potential rather than a long list of tools.

HTML & CSS · JavaScript · React · Git · Accessibility basics

Target role	**Junior Frontend Developer**
Education	**B.Tech Computer Science · sample**
Graduation	**2026 · illustrative**
Availability	**To confirm during hiring**

Vadodara · Open to relocation / remote

FICTIONAL SAMPLE

CAPABILITY / CONTENT / EVIDENCE

Skills I can put to work

01

Interface implementation

Build responsive pages with semantic HTML, reusable CSS and predictable interaction states.

Responsive layouts + accessible controls

02

Frontend application basics

Manage component state, call an API and handle loading, errors and empty results.

Small React applications

03

Collaborative learning

Use version control, explain decisions and respond constructively to review.

Readable commits + project documentation

Projects, not just course badges

PERSONAL PROJECT

StudyCircle — a clearer study plan

CONTEXT

Students need a simple way to organize a weekly learning goal without a complex workspace.

CONTRIBUTION

Designed and built a responsive planner with local state, accessible forms and clear completion feedback.

Sample project brief, component map and testing notes; repository to be added.

LEARNING PROJECT

OpenBooks — a searchable reading shelf

CONTEXT

A catalog needs usable search, empty states and a clear item-detail view.

CONTRIBUTION

Built a small API-driven interface and documented error handling and responsive behavior.

Sample case study with explicit individual contribution and next improvements.

These examples show the intended content structure. They are original fictional studies—not verified clients, completed research, clinical outcomes, endorsements or product performance.

FICTIONAL SAMPLE

APPROACH / EXPECTATIONS / NEXT STEP

How I approach an unfamiliar task

01

Clarify

Restate the task and ask about constraints.

02

Break down

Separate the interface, data and interactions.

03

Build

Implement a small working slice first.

04

Review

Test, document trade-offs and ask for feedback.

Education & learning

2022–2026

B.Tech · Computer Science

Fictional education entry. Replace institution, dates and grades with verified details.

2025

Frontend practice track

Structured practice in semantic HTML, CSS layout, JavaScript and React.

Working habits

Build, test, explain

Maintain a small project log and test keyboard navigation and mobile behavior.

GOOD FIT

Junior roles with clear expectations, thoughtful feedback and opportunities to own small features.

IMPORTANT BOUNDARY

Claims of senior-level expertise or professional achievements from fictional projects.

Are the projects commercial work?	No. These are illustrative personal and learning projects, not client engagements.
Can you share source code?	Replace the sample references with real repositories and clear setup instructions.
What role are you seeking?	A junior frontend role with product collaboration and a practical learning environment.

THE NEXT CONVERSATION
